Objective :

I am seeking a position as a Front-end Developer in an innovative company where I can leverage my expertise in React and Vue.js to build interactive and high-performance user interfaces. I aim to join a dynamic team that fosters professional growth and allows me to contribute to cutting-edge projects that enhance user experience and optimize application efficiency.

Education :

Bachelor of Computers and Data Science
The Higher Institute of Computer, Alexandria, Egypt
Graduation Year: 2020

Experience :

1 - Flojics Technologies (Dubai)

01/2024 – 01/2025

- Developed interactive user interfaces for web applications using React and Vue.js.
- Improved application performance by 25% through code optimization and techniques like Lazy Loading.
- Collaborated with an Agile team to develop the Nyoton Credit project, where I implemented the user interface for balance management and fund transfer functionalities.
- Utilized Tailwind CSS to design responsive and fast-loading user interfaces.

2 - Freelance Front-end Web Developer

02/2022 – 10/2023

- Designed and developed front-end websites and applications for various clients using technologies such as Vue.js, Pinia, Vuex, React, Redux, and Tailwind CSS, in addition to HTML, CSS, and JavaScript.
- Built interactive and responsive user interfaces, contributing to improved user experience and increased user engagement.
- Enhanced website performance through techniques like Code Splitting and Tree Shaking, reducing load times and increasing application efficiency.

3 - Soldier – Egyptian Military Service

11/2020 – 12/2021

Acquired skills in teamwork, time management, and discipline under pressure.

Technical Skills :

- **Programming Languages** : HTML, CSS, JavaScript, TypeScript
- **Frameworks/Libraries** : React, Vue.js, Redux, Tailwind CSS, Bootstrap
- **Tools** : Git, Axios, Webpack, Vite
- **Other Skills** : REST APIs, Responsive Design, Cross-Browser Compatibility, Performance Optimization
- **Soft Skills** : Problem-Solving, Team Collaboration, Fast Learning, Effective Communication

Projects :

1 - Nyoton

Description : A digital credit system that allows users to store, redeem, and transfer balances. (Only the front-end was developed, and it was not connected to the Backend)

Tasks :

- Developed the user interface using Vue.js and Tailwind CSS.
- Implemented interactive user interfaces for viewing balances, redeeming credits, and transferring funds.
- Designed an intuitive and user-friendly experience (UX).
- Collaborated with the team to align the design with Backend developers for future integration.

Results :

- Built a smooth and responsive user interface using Vue.js.
- Improved front-end performance through techniques like Code Splitting and Tree Shaking, reducing initial load time
- Delivered the complete front-end to the company, with the Backend team focusing on completing the integration.

GitHub : (Not publicly available due to company policy)

2 - Wexil

Description : A job search platform featuring a flexible and user-friendly interface. (The front-end was developed and partially connected to the Backend)

Tasks :

- Designed and developed the user interface using Vue.js & Pinia, ensuring a modern and responsive design.
- Implemented advanced search and filtering features to enhance user interaction and usability.
- Focused on creating an intuitive user experience (UX) to simplify the job search process.
- Coordinated with the Backend team to prepare the front-end for future integration, ensuring proper data handling and functionality once the Backend is completed.

Results:

- Delivered a highly responsive and visually appealing user interface using Vue.js & Pinia.
- Optimized front-end performance by implementing Code Splitting and Tree Shaking, reduction in initial load time.
- Prepared the front-end for seamless integration with the Backend, enabling key functionalities like search and filtering to be implemented once the Backend is ready.
- Delivered the complete front-end to the company, with the Backend team focusing on completing the integration.
